

INTERNSHIP EVALUATION REPORT

Arranged by:

Accounting Internship Team

ACCOUNTING DEPARTMENT

FACULTY OF ECONOMICS

PADANG STATE UNIVERSITY

2022

INTRODUCTION

In this report, we will discuss the results of satisfaction questionnaires given by Stakeholders during their internship period at the company. This questionnaire is designed to collect feedback regarding the internship experience and participant satisfaction with various aspects of the company. The aim of this report is to analyze the level of internship satisfaction and identify areas that need improvement to enhance the internship experience at the company.

Skills Internship Practice is a curricular activity packaged in a course, namely Skills Internship. Skills Internship is a form of student learning process that supports educational programs at FE UNP and practical technical programs found in the field. Implementation of professional skills education that systematically and synchronously combines educational programs at FE UNP and mastery of skills programs obtained through direct experience activities in the world of work which leads to the achievement of a certain level of professional expertise. In this course, learning activities are carried out directly in the world of work. This activity aims to equip students with practical skills in accordance with real work situations and conditions that are not found in college so that students are expected to better understand and have skills in a scientific discipline. The results of this skills internship activity will be one of the requirements for students to complete their education at FE UNP and will determine their success in the world of work after graduation.

Every FE UNP student is required to take part in a skills internship which is carried out directly at a company or government agency. This internship is one of the many courses available at FE UNP. Students must carry it out seriously so that the implementation of the skills internship is maximally successful. In implementing this skills internship, it is hoped that there will be a match between the competencies obtained by students in higher education and the practicum activities carried out in the company or government agency where the internship is located.

In 2020, considering Covid, internship activities will be carried out online or WFH in accordance with Government regulations. The Faculty of Economics provides 2 alternatives for students to take part in internships or carry out observations. The following is data on students who took part in internships in 2022

Table 1. List of Students and Internship Places 2020

NO	NIM	NAME	APPRENTICESHIP PLACE

136	19043102	Khairunisa	PT. BPD West Sumatra (West Sumatra Development Bank)

On the other hand, synergy is needed between the world of work and educational institutions in Indonesia. It is hoped that a partnership relationship will be established between FE UNP and the world of work. Skills Internships are also intended to understand and find out what basic skills the world of work actually has to improve the quality of human resources more broadly. So, through this internship activity, FE UNP wants to develop its skills as an institution that produces work-oriented professional staff. To see the student's seriousness, what is done during the skills internship at the internship site is recorded in the form of a Daily Activities Journal or what is called a logbook. This journal is proof of what work has been done and the extent of the student's performance while carrying out a skills internship at the institution or company where the internship is

Apart from that, to gain understanding of the activities carried out, students must also write group reports containing the activities they carried out, and individual papers containing discussions and problem solving in cases observed in government agencies and companies where they interned. The information that students bring will be analyzed theoretically after they return from their internship.

At the end of this internship activity, the internship company will be given a questionnaire to carry out an overall assessment of the student's performance during the internship activity. The questionnaire will be filled out by the supervisor or tutor who has been appointed by the company to help the internship students. The questionnaire is attached below:

METHODOLOGY

A satisfaction questionnaire was developed using a Likert Scale. The questionnaire covers various aspects of the internship starting from integrity, expertise or skills, English, Use of IT, Communication, Teamwork and Personal development. Companies are asked to rate each aspect using the scale provided.

Results of the Internship Assessment Questionnaire by the Internship Place Company

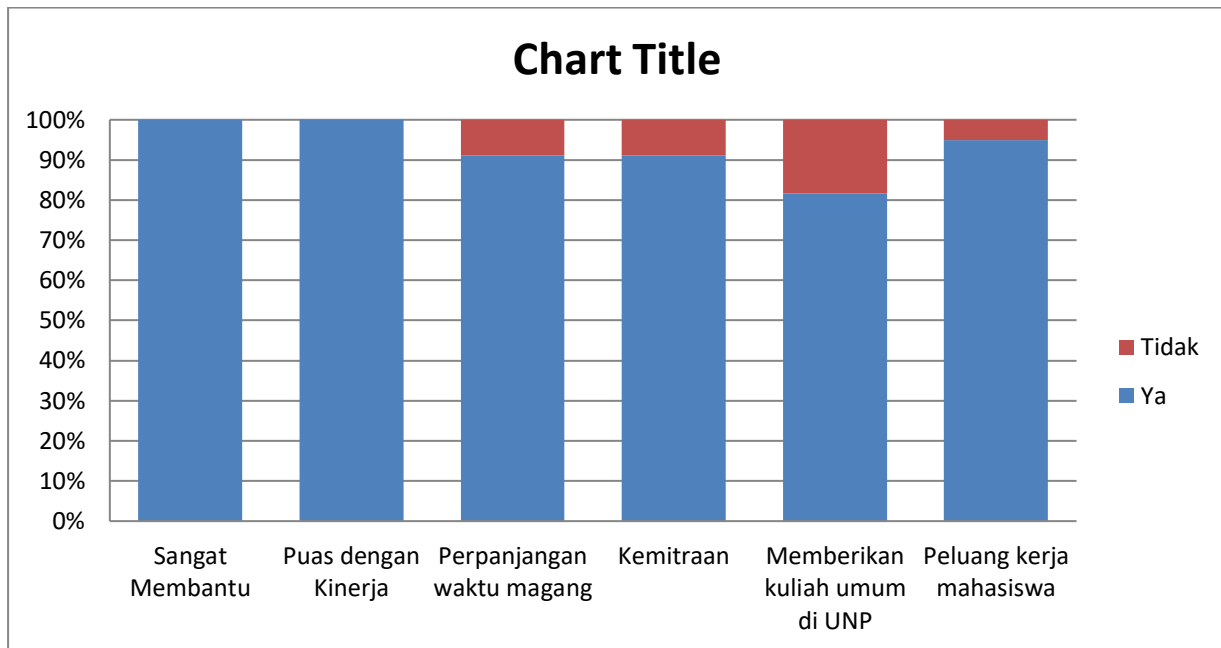

Figure 1 Internship Student Evaluation Graph

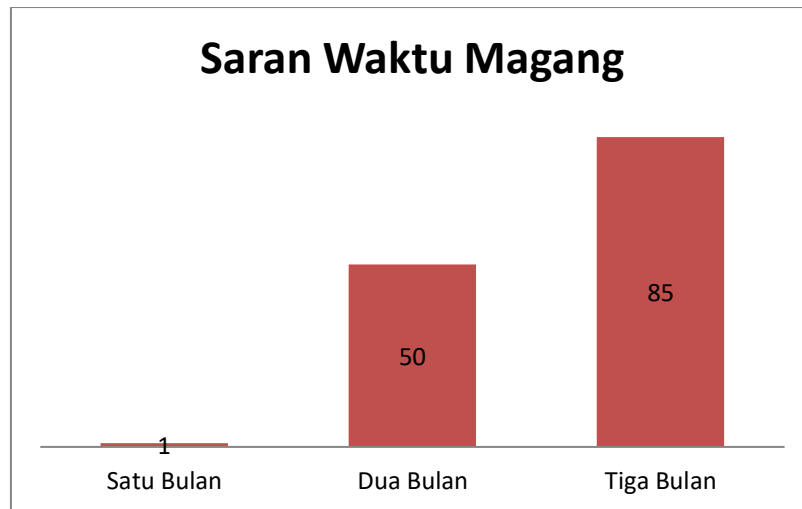

Based on the graph above regarding the Evaluation of Accounting Internship Students Class of 2019 in 2022 which was filled in by 136 respondents, the following data was obtained:

1. All companies and agencies feel helped by the presence of interns.
2. All companies and agencies were satisfied with the performance of the intern students.
3. A total of 124 respondents or around 91.17% of companies and agencies wanted an extension of student internship time.
4. A total of 124 or around 91.17% of companies and agencies are willing to collaborate with FE UNP in terms of student internships.
5. A total of 111 or around 81.61% of companies and agencies were willing to give public lectures at FE UNP.
6. A total of 129 or around 94.85% of companies and agencies acknowledged that intern students could be appointed as employees in companies or agencies.

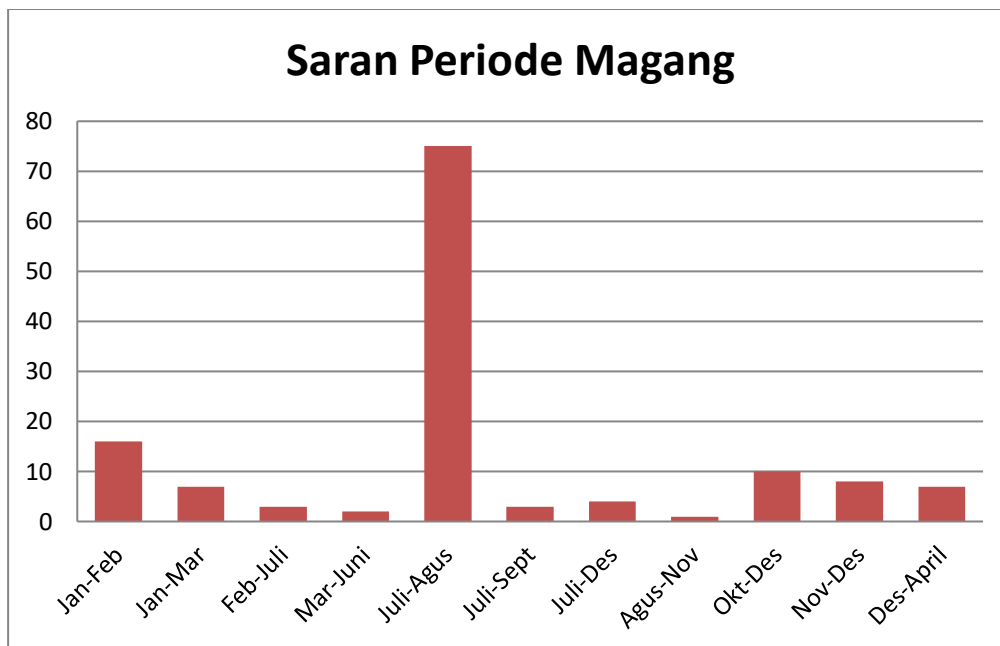

Based on the graph above regarding the evaluation of the 2019 Class of 2022 Accounting students filled in by 136 respondents, the following data was obtained:

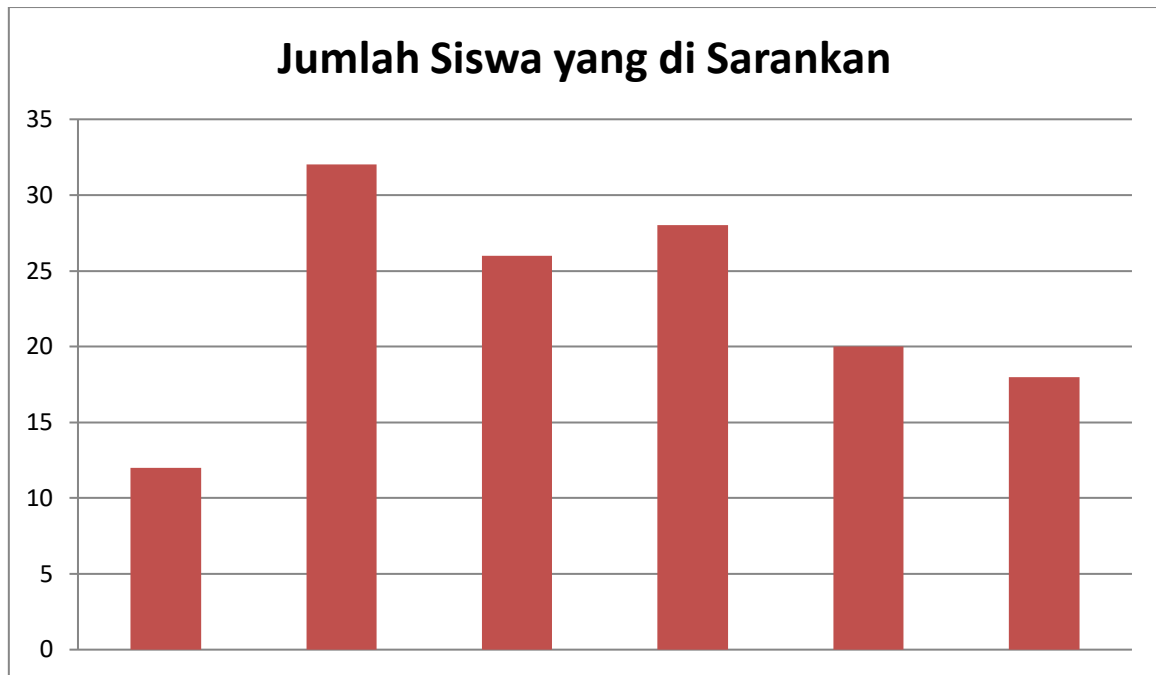

1. 99 students were assessed as having very good integrity and 37 students were assessed as having good integrity.
2. 76 students were assessed as having very good skills and 59 students were assessed as having good skills.
3. 41 students were assessed as having very good English language skills and 85 students were assessed as having good English language skills and the remaining 10 students had adequate English language skills.
4. 69 students were assessed as having very good IT and 67 students were assessed as having good IT.
5. 84 students were assessed as having very good communication and 51 students were assessed as having good communication.
6. 84 students were assessed as having very good cooperation and 51 students were assessed as having good cooperation.
7. 73 students were assessed as having very good self-development and 63 students were assessed as having good self-development.

The internship period for Accounting Students Class of 2019 in 2022 is 40 working days. Based on the picture above, 62.5% or around 85 respondents suggested an internship period of three months. 36.76% or 50 respondents suggested an internship period of two months and the remaining 0.73% or 1 respondent suggested an internship period of one month.

The internship period for Accounting Students Class of 2019 in 2022 will be carried out in the July-December period. From the results, it is known that 55.14% of respondents chose to carry out internships in the July-August period and the remainder in other periods.

Based on the picture above, the company/agency where the 2019 2022 Accounting Student Internships took place provided input for the number of interns: one person was 12 respondents, 2 people were 32 respondents, 3 people were 26, 4 people were 28, 5 people were 20 respondents and the remaining there were >5 people as many as 18 people.

Conclusion

Overall, most internship companies expressed their satisfaction with student interns at the company. However, there are several skills or abilities of students that must be improved, such as English. With the assessment of internships described above, it is hoped that the Faculty of Economics can continue to improve the abilities of its students to suit the needs of the world of work
